

Protected Routes

The application protects these routes with authentication and authorization middleware.

Authentication Required (All Authenticated Users)

Route	Method	Description
/profile	GET/POST	View and update user profile
/settings	GET	User settings page
/my-reservations	GET	View own reservations
/flights/:id/book	GET	Booking form (requires login)
/flights/:id/book	POST	Submit booking (requires login)
/reservations/cancel/:id	PATCH	Cancel own reservation
/reservations/update/:id	PUT	Update seat on own reservation

Admin Only (Authentication + Admin Role)

Route	Method	Description
/admin	GET	Redirect to admin dashboard
/admin/dashboard	GET	Admin analytics dashboard
/admin/flights	GET	View all flights
/admin/flights	POST	Create a new flight
/admin/flights/:id	PUT	Update a flight
/admin/flights/:id	DELETE	Delete a flight
/admin/reservations	GET	View all reservations
/admin/reservations/create	POST	Create a reservation
/admin/reservations/update/:id	PUT	Update a reservation
/admin/reservations/delete/:id	DELETE	Delete a reservation
/admin/reservations/flight-lookup/:flightNumber	GET	Look up flight by number
/admin/users	GET	View all users
/admin/api/users	POST	Create a user
/admin/api/users/:id	PUT	Update a user

Route	Method	Description
/admin/api/users/:id	DELETE	Delete a user
/admin/audit-log	GET	View audit trail logs

Public Routes (No Authentication Required)

Route	Method	Description
/	GET	Home page
/login	GET/POST	Login page
/register	GET/POST	Registration page
/logout	GET	Logout (destroys session)
/search	GET	Search flights page
/results	GET	Search results page
/api/flights/search	GET	AJAX flight search API
/flights/:id	GET	Flight details page
/api/flights/:id/seats	GET	AJAX taken seats API

Middleware Behavior

- **Unauthenticated access** to protected routes redirects to /login.
- After successful login, the user is sent back to the originally requested page via `req.session.returnTo`.
- **Unauthorized role access** (e.g., passenger accessing admin pages) redirects to / with an access denied flash message.
- Logging out destroys the session and clears the session cookie.
- Passengers can only cancel/update their own reservations (ownership check enforced in controller).
